

# Integrate Poker & Popular Card Games

to increase acquisition  
and scale your platform

# EvenBet Gaming

is a high-tech poker and popular card games developer with 19-year expertise and non-stop innovation

# Why Integrate Card Games?

Multiplayer peer-to-peer card games benefits:

- Socialisation
- Higher retention and loyalty
- Outstanding acquisition tool
- Acquisition through communities
- Lower financial risks  
(due to peer-to-peer nature)

# Key Highlights

## Innovation

19-year non-stop gaming software development

## Clear onboarding

Detailed instructions on the settings in the backend

## Smooth API integration

Simple steps and supervision

## Maintenance

Regular updates to sustain the level

## Individuality

Customisation of any type (from changing the logo to complete redesign)

## Customer support

The professional team at your service

# Texas Hold'em

No Limit Hold'em | 6+ Hold'em (Short Deck Hold'em)  
Triton Short Deck | Pineapple | Fixed Limit Hold'em

Texas Hold 'em is the most popular poker game. It is known as the high-action poker with relatively simple rules.

The game's object is for players to form a five-card poker hand that ranks higher than the other players' five-card poker hands.

The game will be played on a standard poker table which shall accommodate up to ten seated positions for patrons.

The principal difference between standard Hold 'em and Short Deck Hold 'em is that in 6+ Hold'em the deck consists only of 36 cards instead of 52. Thus, though the gameplay is identical in terms of streets and betting, the royalties differ.

# Omaha

PLO | PLO Hi-Lo | PLO5 (Big O) | PLO6  
PLO5 Hi-Lo | PLO6 Hi-Lo | Courchevel

Omaha is the second most popular poker game type. This game has the same stages as Hold 'em, but each player gets four pocket cards instead of two, and they must use two of them for a final combination.

In classic Omaha, the pot goes to a player with the best hand. In Omaha Hi-Lo, it is split between one with the highest hand and one with the lowest.

# Stud

Stud Hi-Lo | 7-card Stud | Razz

Game stages are different from Hold 'em and Omaha, and betting rounds are called streets.

Each player is dealt a seven-card hand, some of the cards being face up, with several betting rounds during the deal. At the showdown, players use any five of their seven cards to make the best poker hand.

A standard 52-pack is used, and from 2 to 8 players can take part.

7-Card Stud Hi-Lo is also well-known; it is a split pot game variation where the pot is shared between the highest and the lowest hands.

Razz is a seven-card stud played for low only, using ace-to-five ranking. There are five rounds of betting in this game.

# Telesina (Italian Poker)

Telesina with Vela | Telesina 7A | Telesina 7A with Vela

Telesina is an Italian poker game that is a variant of Five Card Stud.

Unlike other Stud games, Telesina uses a 32-card deck, removing the cards from two to six.

Players are dealt a total of five cards over four betting rounds, where one card is face down, and the other four are shown to the opponents. This makes the game very similar to Five Card Stud, but the main difference is that in Telesina, there will be dealt one community card in the last betting round. The community card is known as “The Vela” and is a shared card among all players as the last chance to improve their hands.

# Draw Games

2-7 single draw | 2-7 triple draw | 5-card draw 7-ace

Draw card games refer to several common poker variants in which players can discard (remove cards from their hands) and draw new cards to try to make a stronger hand.

Deuce to Seven Triple Draw is a 5-card draw low game. Each player is dealt 5 hidden hole cards, and the goal is to make the lowest possible 5-card hand. There are four rounds of betting and three draws in this game. After each round of betting, players may discard from zero to five cards, and the dealer will deal them the replacement cards. The maximum number of players in this game is 6.

# Turkish Poker

## Turkish Poker

Türk pokeri (Turkish poker) is a 5 Card Draw poker variant based on local rules and played with a short deck of 36 or fewer cards (depending on the number of players).

Each player receives five cards, and up to four of them can be exchanged.

# Badugi

Badugi | Badacey | Badeucy

When players get tired of Hold 'em, exotic variations can bring the engagement back, giving players a fresh new flavour.

Badugi originated in Asia and is a variant of draw poker. It shares many similarities with Lowball, as it's the lowest hand that wins. It differs significantly from most popular poker variants, however, as the hand ranking system is different. In Badugi, you're looking for a four-card hand with one of each suit. This is called a Badugi. If more than one player has a Badugi, the lowest hand wins. Normally the lowest Badugi is A-2-3-4.

Badacy/Badacey. This is a split-pot form of Badugi and ace-to-five triple draw lowball. Half the pot is awarded to the best ace-to-five hand and the other half to the best Badugi hand.

Badeucy/Badeucey is also a split-pot game. Each player is dealt 5 down cards. In Badeucy, the Ace is always high. The pot is split between the best Badugi hand (Ace is high) and the best 2-7 hand.

# Chinese Poker Games

Classic | OFC (Open face Chinese) | OFC Progressive  
Turbo OFC | OFC Pineapple

Chinese Poker does not operate by bets, betting rounds, or bluff. Players have to make three combinations out of 13 cards: two of five cards and one of three.

The differences between the variations are:

- the number of cards a player gets at a time (all 13 cards, 1 card, 3 cards of which he may use 2),
- the order of combinations (which one should be the highest),
- all games use a special system of points given to the hand combinations.

The most popular variations are OFC Poker and OFC Pineapple.

# Rummy

Points Rummy | Deals Rummy | Pool Rummy

Rummy is a game that almost every household in India witnesses. However, Rummy's ancestral roots come from the game of conqian, which has a Spanish origin.

There are over 60 variations derived from Rummy.

A few critical differences between Rummy and poker are the following:

- Poker has always been linked to casinos, while Rummy is a domestic card game.
- Rummy is easier to learn, but poker is a lot more rewarding.
- While Rummy is more like a fun game, poker often serves as a professional occupation for many players.

Points Rummy is the most widespread variant of Rummy.

# Call Break

## Call Break

Call Break is a thrilling multiplayer card game that users can consider playing after they've exhausted themselves from playing sufficient poker and Rummy. It's extremely popular in South Asian countries.

This game is played by four players with a 52-card deck. The trump suit is always Spades. The game's goal is to guess the number of tricks that one will take during the game as precisely as possible.

# Teen Patty

## Teen Patty

Teen Patty is an Indian origin card game that became popular in Southeast Asia. The game's objective is to make the best 3-card hand and maximise the pot before the showdown. A standard 52-card pack is used.

Teen Patti is India's twist on 3-card poker and is identical to 3-card brag, which is popular in the UK.

# Mixed Games

Mixed games are when multiple poker games are played in rotation, switching from one to the next after a certain number of hands have been dealt. An operator can set up any customised combination of mixed games in the back-office.

Mixed games are a great option since most players lack the skills and knowledge needed to beat the games that are involved. Plus, learning new variants of poker can be a fun challenge.

# Game Variants and Features

To enrich the variety of options
