Engaging features

Bomb pot

Adds an element of surprise to the game. When it appears at the specially marked table, at any time during the game, the players have to add additional money to the pot, increasing the win. The bigger the prise, the more excitement.

Mini-games in the gameplay

Add side-bets and mini-casino games directly into poker gameplay to maximise audience engagement. Allow users to place bets while playing poker.

Double board

With two card decks dealt, it serves as a game-changer by mitigating risks for players and eliminating the necessity to go all-in.
The pot is distributed between the two winners of each board.

Top game formats for Brazil and South America

Mystery Bounty tournaments

An element of **surprise and an additional reward** for the players. You choose the mystery bounty trigger (for example, a specific number of players left), and a treasure chest appears at the table at this stage.

The intrigue lasts until the end: the bounty size for each player is random and hidden until they are kicked out.

Top game formats for Brazil and South America

Cucurucho game mode

Adds high-stakes moments and thrill to the cash games with a Cucurucho button. When the dealer and the Cucurucho buttons land on the same player, everyone pays an ante and, after flop, is forced to match the total pot or fold.

This creates **exciting and aggressive gameplay** — and bigger wins!
