GAMING

Core Platform Features

- **Player Management**

Manage player accounts: registration, KYC, segmentation, and responsible gaming tools

- **Content Management**

Activate providers and games, organize categories and icons, and control access with performance analytics

- **Game Settings**

Configure bet limits, game visibility, categories, and access restrictions per title

- **Promotions and Rewards**

Manage bonus campaigns with casino tournaments, loyalty tools, comp points, and multi-level campaigns

- **Affiliate Management**

Run multi-level affiliate programs with CPA models, flexible commissions, precise tracking, and holistic reporting

Core Platform Features

- **Reporting & Analytics**

Generate custom dashboards and detailed financial/game reports with export and API access

- **Secure Payments**

Support multi-currency FIAT & crypto transactions with anti-fraud tools and automatic withdrawal verification

- **User Roles & Access**

Assign custom roles, limit access, and logging actions for back-office users

- **CRM & Communication**

Send SMS, emails, and push messages with templates and player group segmentation

- **Anti-fraud Control**

Detect multi-accounting, control cash-outs and money transfers

- **3rd Party Integrations**

Integrate external services like SMS, KYC, and CRM platforms

Games Integrated

Being in the gaming market for long, we've developed tight connections with the leading game providers all over the world.

Engage Your Players Consistently

Player Engagement Engine

Flexible Bonus System

Versatile solution to create and manage promotional campaigns: from basic signup and deposit bonuses to highly engaging missions and quests

Multi-Level Promo Campaigns

Several consistent deposits, restrictions by time, player status, etc

Comp Points & Player Statuses

System of player ratings and rating scores, leaderboards

Cross-Vertical Promos

For different game types

Notification Management

Communication with players using different channels: emails, SMS, push messages

Advanced Segmentation

Promotion segmentation by players/affiliates/providers, etc. Player segmentation by level, status, optional tags

Free Spins

By stages within a certain time period

Protect Your Business From Fraud

Anti-fraud Control

The anti-fraud module monitors user actions in the system, analyzes them, calculates fraud scores, and creates incidents to alert the fraud prevention manager about potentially suspicious behavior.

Key features

- Configurable multi-accounting detection
- Incident confidence system evaluating threat levels of user actions
- An incident list containing all the details about suspicious user activities
- Customizable automatic reactions: from email notifications to complete user block

Set Up & Control Payments Systems

- **Integrate local payment systems** that work specifically for your players
- **Seamless payment gateway integration** with ready-to-use tools
- **Set up limits & availability**
- **Leverage cryptocurrencies**
- **Benefit from separate bonus and deposit balance** for each type of game

- **Prevent fraud** with separate tracking of deposits, won amounts, and bonuses
- **Provide your players with easy withdrawals** — both manual and automatic
- **Get automatic verification** of payments for withdrawals
- **Leverage merchant account analytics** across payment systems
- **Enjoy convenient reports and dashboards**

Build a Net Of Loyal Affiliates

Affiliate Management Engine

- Multi-level agent system
- Flexible commission management (CPA, RevShare, Rakeback, Hybrid)
- Precise tracking
- Holistic reporting and big data
- Multi-currency support
